User Input Activities- Unit 2.3

Activity 1: Personal Profile Page

Extend the "About Me" web page to include a contact form with a button for user interaction. Inside the "index.html" file in the "My Website" folder:

- After the introductory paragraph, add an <h2> tag for the contact form heading, such as "Contact Me."
- Use the <form> tag to create a simple contact form with fields like name, email, and a message.
- Integrate <input> tags for text input (name, email) and a <textarea> tag for the message.
- Include a <button> tag labelled "Submit" for users to submit the form.

Activity 2: Employee Data

Enhance the employee data table by adding a button to view employee details and a form for data input.

- Inside the "employee_data.html" file:
- In each data row, add a <button> tag labelled "View Details." This button will serve as a link to a detailed employee profile.
- Below the table, create a new <form> to input new employee data. Include <input> tags for Id, Fname, LName, Position, and Salary.
- Add a <button> with the label "Add Employee" to submit the form.
